

MOSQUITO DUNKS®

MOSQUITO PROBLEMS START AT HOME!
WHEREVER WATER COLLECTS

IN OLD BOTTLES AND CANS

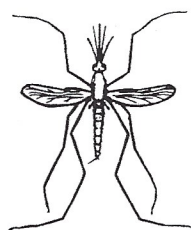

IN OVERGROWN PONDS

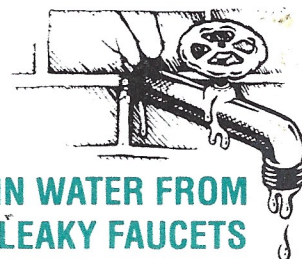

IN LEAF-CLOGGED GUTTERS

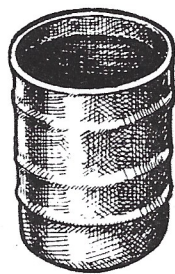

IN FLOWER POT DISHES

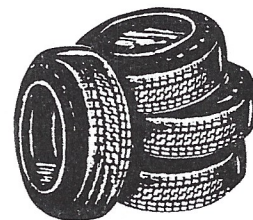

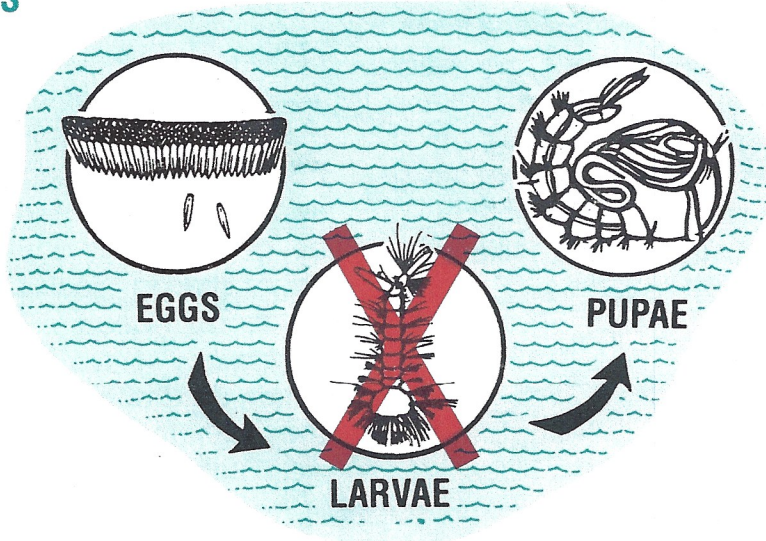

ADULTS

IN WATER FROM
LEAKY FAUCETS

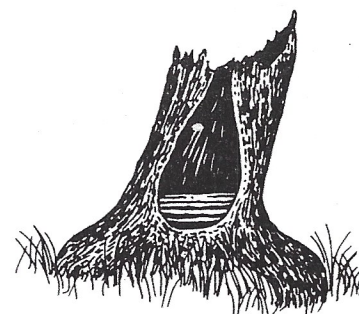

IN RAIN BARRELS

IN USED TIRES

IN BIRD BATHS

IN TREE HOLES

IT TAKES ABOUT ONE WEEK
FOR A MOSQUITO TO GROW
FROM EGG TO ADULT

DON'T GIVE MOSQUITOES A CHANCE!

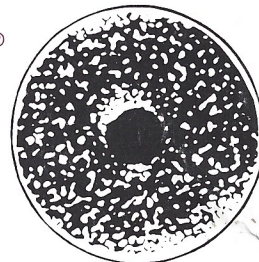

MOSQUITOES NEED WATER TO BREED AND GROW. IT DOESN'T TAKE MUCH WATER AND IT DOESN'T TAKE MUCH TIME. SO, ALMOST ANYTHING THAT WILL HOLD WATER FOR ONE WEEK OR MORE CAN PRODUCE THESE PESTS. MANY PLACES AROUND YOUR HOME MAY BE CAUSING MOSQUITO PROBLEMS.

THROW "**MOSQUITO DUNKS®**" IN THEM AND MOSQUITOES WON'T HAVE A CHANCE

MOSQUITO DUNKS®

MOSQUITO PROBLEMS START AT HOME!
WHEREVER WATER COLLECTS

Kills Mosquitoes Before They Become Old Enough To Bite

ENJOY THE OUTSIDE OF YOUR HOME ALL SUMMER
WITHOUT PESKY BITING MOSQUITOES!

HOW MOSQUITOES GROW...

Mosquitoes lay their eggs in water standing around the outside of your home. It could be water in bird baths, old tires, rain barrels, streams, ponds, ditches, woodland pools, outdoor tubs, unused swimming pools, tree holes, flower pots, vases, roof gutters, or any other container around the household where water collects and remains for periods of time.

These eggs are very hardy and manage to live under almost all conditions. When the water temperature is right, the eggs hatch and become mosquito larvae (often called "wigglers") which swim around eating and growing, bothering nobody. In about a week they become full-grown mosquitoes and fly out of the water looking for someone to bite.

NOW YOU CAN KILL MOSQUITOES AROUND YOUR HOME BEFORE THEY GROW UP AND BECOME NASTY BITERS.

HOW "MOSQUITO DUNKS®" WORK...

This patented product has been used by mosquito control professionals since 1983. MOSQUITO DUNKS® are made with *B.t.i.*, a **natural organic** ingredient which kills mosquito larvae feeding on it. DUNKS contain **no poisonous chemicals** and are harmless to other living things. They will continue to kill mosquito larvae for 30 days or longer and are completely **biodegradable**.

Once a month during the mosquito season, simply leave a floating MOSQUITO DUNK® in each place water collects around your home. Mosquito larvae will feed on them and be killed continuously. You will then be rid of biting adult mosquitoes for the entire season. Each DUNK will take care of up to 100 square feet of water surface, regardless of depth. MOSQUITO DUNKS® which dry out will start working again when they become wet. Unused DUNKS will remain active indefinitely.
